***Claims Allowed***

Claims 1-5 are allowable over the prior art of record. The claims are allowed because the prior art does not anticipate nor render obvious the invention of a synchronization arrangement for a ring gear in a planetary transmission wherein the arrangement is disposed coaxially with the gearing between a ring gear and a gear housing, a single synchronizer ring is constructed with a mirror-inverted synchronization ring thereby forming a double synchronization ring, a displaceable clutch sleeve is provided to actuate the ring and is fixed to the ring gear, and whereby there is at least one spring suspension element that transmits a bearing force from the clutch sleeve to the ring during synchronization.

***Prior Art Discussed***

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed September 24, 2003. None of the references show all of the claimed features.

The references cited by the examiner are deemed pertinent to applicant's disclosure. None of them show all of the features as claimed. Buri '347 shows a synchronization device for a ring gear in a planetary gearing, but the clutch sleeve is not fixed to the ring gear. Larsson '538 shows another synchronization arrangement for a ring gear, but lacks a single synchronization ring.

***Conclusion***

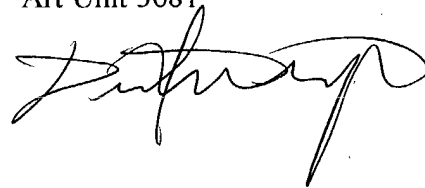

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dirk Wright whose telephone number is 703-308-2160. The examiner can normally be reached on Monday through Friday, 8AM-4:30PM.
